

Table 3. OLS Regression Analysis of Force of Direction on Suicide-Homicide Ratio Variable.

Variable	B	Beta
Teen women with own children	-.001 (.068)	-.015
Unemployment rate	-.838 (.289)	-.105***
Gini index	-27.070 (10.924)	-.073*
Infant mortality rate	-1.068 (.188)	-.179***
Percentage Non-white	-.514 (.044)	-.430***
South (south =1)	-7.547 (.965)	-.220***
County Population ^a	-3.195 (.672)	-.156***
Percentage Immigrants	-.173 (.089)	-.066
Segregation Index	-14.391 (3.300)	-.131***
Divorce Rate	-.219 (.245)	-.023
Professional work force	-.002 (.098)	-.021
Percentage college-educated	.001 (0.74)	.036
Constant	156.216 (9.525)	
R-square	.760	
F value	117.330***	
	N=458	

^a Natural log transformation

* p< .05, ** p< .01, *** p< .001 (two -tailed tests)
